II. DISCUSSION

A. WIPO Patent Reference No. WO 98/15075

Based solely on the drawings and the attached English-language Abstract, the '075 reference is pertinent because it appears to disclose a telematics device that includes a car radio with an RDS module and a GSM module. It is believed that U.S. Patent No. 6,282,491 corresponds to the '075 reference.

The '075 reference patent was cited in an Examination Report (copy enclosed) regarding corresponding European Patent Application No. 01 309 975.9.

III. CONCLUSION

It is believed that none of these references, alone or in combination, disclose or suggest the invention claimed. However, Applicants wish to make it clear that the disclosure of the above references is in no way an admission that they qualify as prior art. It is Applicants' desire,

however, to have these references available in the record for both the Examiner and the public to see. Applicants therefore request that the Examiner review the entire disclosure of each reference and make the above-listed references of record.
